MW MaxxScreen – for projections in gigantic dimensions

Projections in over-sized rooms such as exhibition halls, congress centres and lecture halls require correspondingly large projections screens in order to achieve a professional and attractive presentation.

The MW MaxxScreen has been designed for this exact application area and can be produced up to a size of **12 m wide** and **7 m high** as standard with a **seamless** projection surface.

- High quality, sturdy square steel casing in 1 mm sheet steel
- Casing colour: white, RAL 9010
- Ceiling mounting planned as standard
- Wall mounting up to and including a housing diameter of 20/20 cm on request at an additional charge, please consider this when ordering
- Mounting set for installation in suspended ceilings available at an additional charge
- Installation frame with inspection flap, continuous riveted rim available upon request at an additional charge
- Maintenance-free special winding shaft, low-noise and oscillation-free
- Stepless height adjustment of the screen surface

Different dimensions and special formats available.

We recommend requesting professional advice before the purchasing and assembling a MaxxScreen.

Screen surface

- Front projection, **type D**
- DIN 19045 gain factor, appr. 1.1

Projection surface type S and rear-projection upon request.

The projection surfaces are possible in 3 different designs

- A seamless woven fabric with good flatness
- A fibreglass reinforced support with very good, even flatness
- Design with screen surface on foil base with tab tension for the best flatness

More information is available on the projection surfaces on request.

The MW MaxxScreen corresponds with the highest safety requirements according to DIN 19045

- The projection surface is attached to the winding shaft with an ultrastrong multi-component adhesive
- Construction design according to DIN 19045, 1-4
- Safety technology according to DIN 19045, 5
- Maintenance-free geared motor with automatic limit shut-down, overheat protection and right drive
